JOB EXPERIENCE

Adalyon, Helsinki, Finland

01/2024 – -/-

Software Engineering Software Developer

- Part of a team building a behavioural analytics platform from the ground up.
- Combined different machine learning techniques to accurately measure team dynamics.
- Worked across the whole technology stack, including e.g. data engineering, web development and iOS development.
- Worked with technologies such as pytorch, coreml, python, fastapi, Microsoft Azure, swift, c++ and typescript.

Reaktor, Helsinki, Finland

05/2021 – 01/2024

Software Engineering Software Developer

- Collaborated with numerous clients to resolve business-critical technical issues.
- Extensive experience helping critical software projects succeed in the Defence and Security domain.
- Part of both junior and senior recruitment teams. Conducted both technical and non-technical interviews.
- Worked with a variety of technologies, such as React, TypeScript, Node.js, Clojure, Java, ClojureScript, PostgreSQL and AWS.
- Got to take part in many trainings, such as Cyber Security, Certified Scrum Master and Consulting 101.

Puheet.com, Espoo, Finland

10/2020 – 05/2021

Software Engineering Software Developer

- Was responsible for business critical platform components, such as the main backend system and multiple web frontend applications.
- Worked with a variety of technologies, such as React, Vue, TypeScript, PHP, Node.js, MySQL, Elasticsearch Linux and AWS.

SKILLS

- **Ways Of Working:** Love helping teams thrive and make projects succeed. Extensive experience of facilitating activities such as retros and project kickoffs.
- **Program Languages: multilingual** (not limited to any specific language), especially experienced in TypeScript, Clojure, Haskell, Python and C#, comfortable with Rust, C, C++, Java and Ocaml (in random order).
- **Web Technologies:** Extensive experience working with React, Next.js, FastAPI, dotnet, Express.js..
- **Programming Paradigms:** Deep understanding of ins and outs of different programming paradigms, such as functional, object oriented, logic and array programming. Understand that different paradigms fit different problems, and that there are no silver bullets.
- **Cloud Technologies:** Extensive experience with clouds technologies such as Microsoft Azure and AWS. Experience with developing and maintaining infrastructure pipelines using the Infrastructure as Code methodology.
- **Programming Practices:** I value in high quality software and I always strive to find better ways to deliver it faster and more reliably..
- **Compilers:** Experience with parser generators, parser combinators and layout-sensitive syntax parsing. Familiar with multiple evaluation strategies such as normalization by evaluation (NBE) and abstract machines such as CEK and CESK machines.

PROJECTS AND CONTRIBUTIONS

fp A small, weird and unpractical programming language. 

- fp is a programming language heavily inspired by the language John Backus described in his 1977 Turing Award lecture.
- based on a [paper](#) by John Backus.

v1 Shell scripting in TypeScript. 

- v1 is a tool for writing shell scripts in TypeScript. It is powered by [deno](#).

aoc Solutions to [Advent of Code](#) problems in many programming languages. 

- [2015](#), [2016](#), [2020](#), [2021](#), [2022](#), [2023](#).

MISCELLANEOUS

- As a hobby I like to do rock climbing, solve programming puzzles and study mathematics. Lately I've been studying Algebraic Geometry and specifically it's computational aspects.
